PROFILE

Computer Science graduate (B.Tech, 2026) with hands-on SIEM monitoring, log analysis and alert triage experience. Built a 3-VM SOC lab (Wazuh, Suricata, Splunk) with MITRE ATT&CK-mapped detections, a WAF lab blocking SQL injection and HTTP floods, and a VulnHub penetration test report. Seeking an entry-level SOC Analyst (L1) role.

SKILLS

Security: VAPT, OWASP Top 10, Web Application Security, SIEM, Log Analysis, Threat Detection, Network Security
Tools: Burp Suite, Nmap, Metasploit, Wireshark, Wazuh, Suricata, Splunk (SPL), SafeLine WAF, OpenSSL
Languages & Web: Python, Bash, SQL, JavaScript, React.js, Node.js, Express.js, REST APIs
Platforms: Kali Linux, Ubuntu, Windows, VMware, VirtualBox, Docker, Git
Networking: TCP/IP, DNS, HTTP/HTTPS, TLS, SSH, Firewalls, Reverse Proxy, VPN
Security Operations: Alert Triage, Incident Response, MITRE ATT&CK, IDS/IPS, Threat Intelligence, Vulnerability Assessment

EXPERIENCE

Rajasthan Centre of Advanced Technology, *Cyber Security Trainee* 05/2026 – 07/2026
Jaipur, Rajasthan
Completed hands-on training in SOC operations, SIEM monitoring, security log analysis, threat detection, incident response fundamentals, network security, web application security (OWASP Top 10), and penetration testing using Kali Linux, Nmap, Metasploit, and Burp Suite.

IQUINCESOFT, *Web Development Intern* 05/2025 – 07/2025
Mathura, Uttar Pradesh
Built responsive web interfaces with React.js, JavaScript and Tailwind CSS, deployed on GitHub Pages for client demos.

PROJECTS

SIEM & Threat Detection Lab, *Wazuh, Suricata, Splunk, Linux, Windows*
- Built a 3-VM home SOC lab (Ubuntu, Windows 11, Kali Linux) with Wazuh in Docker, monitoring Linux and Windows endpoints for file integrity changes, vulnerabilities and malicious commands (auditd).
- Detected network intrusions and malicious files by integrating **Suricata IDS** and **VirusTotal** with Wazuh, and stopped SSH brute-force attacks (**MITRE ATT&CK T1110**) with automated active-response blocking.
- Wrote 4 Splunk **SPL** detection queries mapped to **MITRE ATT&CK T1110** (failed logins, repeated authentication failures, successful logins, unauthenticated connections) and a dashboard with geo-location to investigate SSH attacks.

Web Application Firewall Lab, *SafeLine WAF, DVWA, Apache, OpenSSL, Kali Linux*
- Protected a vulnerable web app (**DVWA**) in a 2-VM lab by placing SafeLine WAF in front of it as an HTTPS reverse proxy, with a **4096-bit RSA** certificate made in OpenSSL and plain HTTP disabled.
- Blocked **SQL** injection from a Kali attacker (confirmed by switching detection off and on), stopped HTTP floods with a rate limit of 3 requests per 10 seconds, and added IP block rules and an authentication gate.

VAPT: DC-1 (VulnHub), *Kali Linux, Nmap, Metasploit, Drupal*
- Gained root access end to end: enumerated services with Nmap, exploited a Drupal remote code execution flaw (Drupalgeddon) with Metasploit, and escalated privileges through a misconfigured **SUID** binary (**MITRE ATT&CK T1548.001**).
- Documented the full attack chain with remediation steps in a penetration test report.

Phishing URL Detector, *Python, scikit-learn, Flask*
- Built a hybrid phishing URL detector in Python (3 rules plus a Random Forest on 20 features such as domain entropy), achieving 100% precision, recall and F1 on an 800-URL held-out test set; deployed as a Flask app with explainable verdicts

EDUCATION

B.Tech. in Computer Science and Engineering, 2022 – 2026
Government Engineering College Bharatpur (RTU, Kota) Bharatpur, Rajasthan
CGPA: 7.69

CERTIFICATIONS

Certified LLM Security Expert (CLLMSE) — Red Team Leaders, Aug 2026(Credential ID: 93d4b823297411b1)
Cyber Security 101 — TryHackMe, Jun 2026 (Credential ID: THM-KS3BYQP176)
Cybersecurity Analyst Job Simulation — Tata via Forage, Jun 2026 (Credential ID: P3Rwbp7c4QZofRv2j)
